

**B A C K P A C K P R O G R A M**

*Our initial focus of the \$5 for Five fundraising campaign will be to fund the backpack program in District 5. This program is through Harvest Hope Food Bank in Columbia, South Carolina. The purpose of the backpack program is to provide healthy foods for those children who have limited access to food on the weekends.*

*District 5 has seen a growing need to assist with the nutritional needs of students in our district. Each weekend a child will take home a backpack that is filled with nutritional foods for the weekend. The hope is that they will come to school on Monday ready to learn having had food during the weekend.*

***Campaign to raise  
funds to enhance  
educational  
opportunities for  
the extraordinary  
Students and Staff  
in District 5.***

**District 5 Foundation for Educational Excellence**

There is a saying that “It takes a village to raise a child”. With that thought in mind it takes a community to support it’s schools. School District 5 of Lexington and Richland Counties has been the foundation of our community and is what attracts many families to live here. It is a district with a rich history and outstanding teachers, administrators and staff. BUT, our schools need our support. It is up to us as a community to stay involved and to give back to our schools. Every little bit helps and ultimately generations to come will flourish in our community.

**\$5 for Five Campaign**

***The \$5 for Five campaign encourages parents and community members along with teachers, administrators and staff of District 5 contribute. The 2011 inaugural year will focus money raised on a Back Pack program for children. This is a program that will pack a backpack for underprivileged students in District 5 with healthy foods for the weekend. The cost per child is \$250 for the school year.***

**Educational Initiatives**

***In these economic times with decreased funding it is important that District 5 continues to be a leader in our state and nation with unique educational opportunities. Now more than ever we see the importance of math, science and technology. We must prepare our students for an ever changing world.***
